

As the world looks for technology that will help to decarbonise heating infrastructures, LaZer2 solar thermal is proud to do its bit.

**It's time to turn on the sun.**

A new LaZer2 solar thermal system comes with a 10-year product warranty and, if serviced once a year by our highly skilled engineers, **will** provide carbon-free hot water for many years to come.

**An accredited British manufacturer of solar thermal technology**  
**Solar thermal systems designed for a Northern European climate**  
**Installation and commissioning teams specialising in LaZer2 technology**

LaZer2 solar thermal collectors are tried and tested; the first models were launched in 2005 and are still performing today.

Proudly *Made in Britain* at our factory in East Sussex, LaZer2 panels are today delivering carbon-free hot water across the UK and Europe, for many residential customers and for public buildings, commercial offices, hospitals, universities, libraries, leisure centres, manufacturing plants, farms, dairies, local authorities, the emergency services, and many other customers.

**MCS approved product, certified by the BBA**

**Listed in UK Government's Energy Technology List**

**10-year Product Warranty**

**Tested to EN12975 for both performance and quality by SPF:C697**

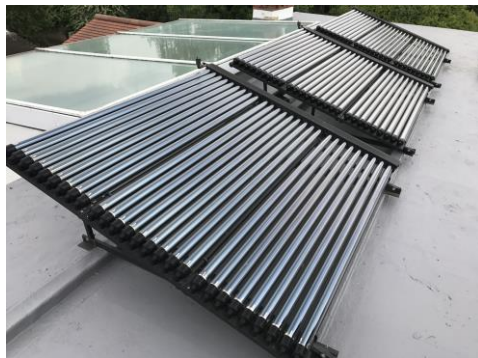

A LaZer2 solar thermal system will be able to provide up to 70% of the annual hot water requirement of an average household.

LaZer2 solar thermal is a modular system allowing various design scenarios from small domestic to large scale commercial and industrial applications

A sleek, compact, design that can be mounted in various formats – flat roof, ground mount, walls, standard pitched roofs.

Recognised by many authorities as one of the most efficient solar thermal panels in the world, LaZer2 is proud to sit on the UK Government's Energy Technology List.

LaZer2 solar thermal is a Solar UK brand. Examples of recent installations by Solar UK:

9-panel system on a flat roof with mounted incline for hot water and swimming pool

6-panel system on a flat and pitched roof installed for a swimming pool

4-panel system on a standard pitched roof installed for a cricket club's hot water and showers

5-panel system on a terraced roof for a domestic hot water system

Please take the time to get in touch.

We are proud of LaZer2 solar thermal, and we love telling people all about it.
