

## Solar Thermal Systems for pools

The LaZer2 Solar System is the result of extensive research and development, tested alongside other leading solar hot water systems to ensure that they offer the highest level of performance.

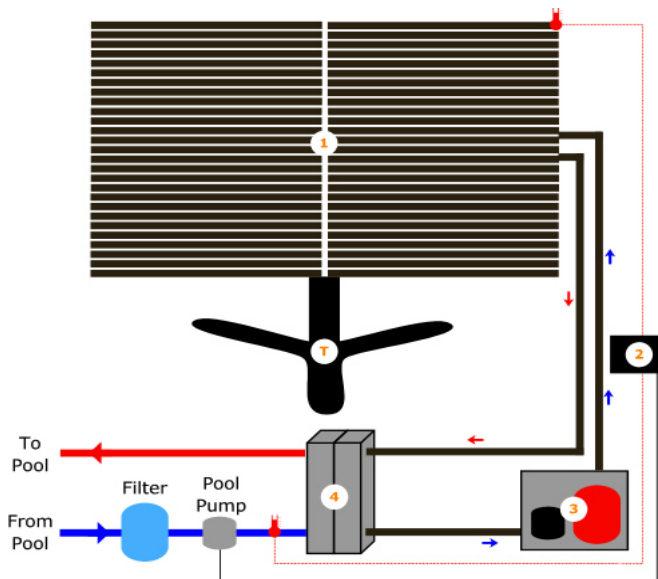

The principal is that whenever there is a temperature differential between the collectors and pool, then the pump starts and transfers the energy into the pool.

By using a LaZer2 system to heat your swimming pool water you will be able to maximise the use of your pool, save money and help the environment in the process.

### How it works

The system comprises the following main components: LaZer2 Solar Panels, Digital Controller, Circulation Module, a Heat Exchanger.

1. LaZer2 Solar Panels
2. Digital Controller
3. Circulation module
4. Heat Exchanger

### LaZer2 Systems will:

- Integrate with an existing pool system
- Work effectively as the only heat source
- Radically reduce water heating bills
- Heat your water for free throughout the year
- Require no scheduled maintenance
- Drastically reduce CO<sup>2</sup> emissions

### The Solar UK Lazer2 solar collector

The LaZer2 Solar Thermal Collector has numerous benefits over competing products.

This product is designed and constructed in the UK for the changeable Northern European climate.

**These superior collectors include the following attractive key features:-**

BBA certified (British Board of Agreement)

MCS Approved and Certified (Microgeneration Certification Scheme)

Tested to EN12975 for both Performance and quality by SPF:C697

25 Year manufacturer's warranty against loss of vacuum

10 Year manufacturer's product warrantee

Warrantee insurance available under REAL assurance scheme

**This is what some of our customers have to say:**

*'I am delighted with the outcome, superb'*

*'The Installation team were excellent'*

*'I shall continue to recommend SolarUK without hesitation or reservation'*

*'It was all so easy, from the planning to the final installation, a very professional service'*

*'I just love the idea of the sun providing the energy to heat my water'*
