

## CASE STUDY

- Rural location
- Roof top solar PV
- Residential client direct

## Residential client – E. Sussex

We were appointed by a local residential client to install a solar PV roof top scheme for their rural out-building. Utilising 20 x 400W Eureka PV panels, on a K2 mounting rail, the client was able to achieve an estimated 8,848 kWhrs annually. The Solax 8kW Dual MPPT inverter was positioned within the building.

Based in East Sussex, Solar UK have been installing solar PV and solar thermal in the UK and Europe for 25 years. Solar UK manufactures, supplies, installs and maintains fully accredited, advanced solar systems specifically for the UK climate. As well as being trusted suppliers and installers to both domestic and commercial customers, Solar UK is also one of the UK's leading solar research and development companies.
