

CASE STUDY

- **Project:** Commercial rooftop solar PV
- **Site:** WPP Campus Headquarters, London
- **Main Contractor:** Structure Tone (London)
- **Client:** WPP plc.

WPP Plc. Campus - London

Solar UK is proud to have delivered for two world leading companies in their respective fields.

We were appointed by Structure Tone Int. to deliver a solar PV roof top scheme for their client, WPP Plc, at their campus on Southwark Bridge Rd. in London. With a roof structure already in place, Solar UK utilised its in-house fabrication team to design a bespoke mounting system.

Our team then positioned 120 JA Solar 500W panels in 2 arrays. With c.40m of cabling linking the system to the plant room and 2 SolaX 25kW inverters.

“This was a great project to be asked to deliver. Central London locations are always a logistical challenge, but our Operations team and Install team rose to the challenge and commissioned the project on time and on budget”

- Duncan Lee (Technical Director) Solar UK

WPP Plc. Campus - London

Structure Tone Int. are defined by their unique culture—one that rewards creativity and focuses on solutions that supports their customers. Brimming with new ideas, our diverse and experienced team are always focussed on delivering an exceptional experience and product to those we work with.

WPP plc is a British multinational communications, advertising, public relations, technology, and commerce holding company headquartered in London, England. It is the world's largest advertising company. With a smart building strategy to drive carbon reduction across all WPP workplaces, WPP is currently undergoing a rolling programme of transformation, which includes the delivery of their vision for campuses globally. This ambition will see 85,000 of their people move into at least 65 world-class, net zero campuses by the end of 2025, powered entirely by renewable electricity.

Based in East Sussex, Solar UK have been installing solar PV and solar thermal in the UK and Europe for 25 years. Solar UK manufactures, supplies, installs and maintains fully accredited, advanced solar systems specifically for the UK climate. As well as being trusted suppliers and installers to both domestic and commercial customers, Solar UK is also one of the UK's leading solar research and development companies.
