

CASE STUDY

- Residential location
- In-Roof solar PV and battery energy storage system
- Residential client direct

Residential client – East Sussex

Appointed by the client direct, we installed a 3.6kWp PV system using 8 x 450W JA Solar modules.

Using the GSE in-roof mounting system, the panels were placed on the garage roof. We supported that with a 3.6kW hybrid Powervault battery energy storage solution, with 10.4kWh of storage.

Residential client – East Sussex

Based in East Sussex, Solar UK have been installing solar PV and solar thermal in the UK and Europe for 25 years. Solar UK manufactures, supplies, installs and maintains fully accredited, advanced solar systems specifically for the UK climate.

As well as being trusted suppliers and installers to both domestic and commercial customers, Solar UK is also one of the UK's leading solar research and development companies.
